The Idea:

We, as Palestinians have a hard time finding fun activities or new places to visit, and foreigners are not any different. Therefore, our website solves two problems, one is that it gives people events to participate in, and gives foreigners (or even Palestinians) easy tours around the city.

Requirements:

1- A home page which describes our website and how it works.
2- Login and registration with Spring security validations.
3- A form for event creation.
4- A form for tour creation.
5- A page to show a specific event or tour.
6- User profile page.
7- Edit pages for events and tours.
8- Users can send info through Gmail (API).
9- Users can join events or tours or both and reserve a spot.
